

# **FLEXO** Sail-Mate™

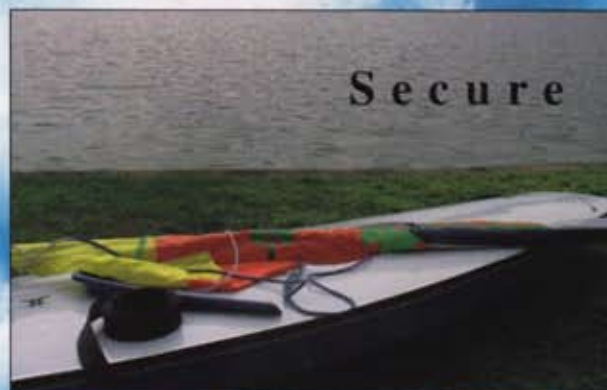

Sail Cover For Sunfish  
Sail Cover For Sailfish  
Sail Cover For Sail Boards

## YOUR SAIL'S BEST FRIEND

**F**LEXO's *Sail-Mate* Sail Cover is the ideal method of protecting your sunfish style sail. For storage, the *Sail-Mate* is great because it keeps the sail tightly bundled preventing damage to it. When you are stowing your sail, just slide your *Sail-Mate* over it and store it with peace of mind. FLEXO's unique expandable characteristics attractively hold the sail and supports together as an easy-to-handle unit. FLEXO's mesh construction allows your sail to dry while in storage or while you travel. As for traveling, your sail will be safely stowed to prevent unraveling.

### Advantages:

- Easy to use
- Expands to fit a variety of sails
- Highly durable 15 mil. material
- Allows the sail to dry
- Looks great when applied
- Protects sail from rough handling
- UV light protection
- Lightweight
- Rolls up small when not in use
- Works like a bag, holds like a bungee cord
- Big mouth opening

# Directions

1

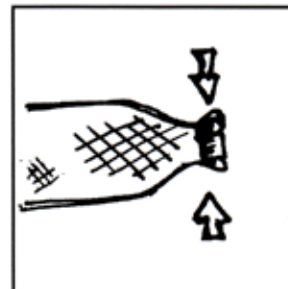

Begin by rolling your sail as if you were stowing it. Now sleeve the wide-mouth opening over the end of your sail.

2

Feed the FLEXTM down the length of the sail by pushing the material from behind and then sliding the bulb formation until tight.

3

Continue sleeving in this manner until the sail is completely engulfed. Now seal the end and the sail is ready to store, travel or stow.
