

T6 Thermashield

Flexible Thermal Reflective Wrap Deflects Radiant Heat up to 1,400°F

The newest item in the ThermaShield line of aluminized fiberglass products, T6 is designed for ease of installation when component disassembly isn't practical. Just wrap the pre-formed, split flexible tube around any component and seal the sides with the high temperature adhesive strip to provide protection from hot pipes and engine components.

The highly reflective aluminized exterior, combined with the insulating fiberglass interior, protects delicate wire bundles, cables and lines from damage caused by nearby exhaust pipes, headers or other heat generating components.

- Heat Reflective Aluminum Laminated Fiberglass
- Self Wrap and Seal Overlap with High Temperature Adhesive Strip
- Reflects Radiant Heat
- Resists Gasoline and Engine Chemicals
- Cut and Abrasion Resistant
- Cuts Cleanly with Scissors
- Halogen Free

After long term exposure to extreme temp. (1,400°F) with the distance of 3/8" from the source of heat, T6 Thermashield remains flexible and resilient with no delaminating or breaking of the adhesive.

“T6 can reduce the heat transmission from hot pipes or engine components into hoses or harnesses by up to 50% or more”
