

# How to use Rapid Install Tool...

**TECHFLEX**  
Braided Sleeving Products

## Flexo Sleeving Rapid Install Tool

This tool eliminates the mind-numbing process of applying expandable sleeving to cable bundle. Anybody who has ever tried to install long lengths of sleeving over a cable bundle knows that "worming" the sleeving along the bundle is extremely tedious and time consuming.

With the Flexo Sleeving Rapid Install Tool, the process is dramatically speeded up, considerably reducing labor costs. The system is simple to set up and interchangeable components accommodate diameters up to 2".

The expandable sleeving is loaded onto tube, then the cable bundle is pushed through the back end of the tube just until it appears out of the tube, then the sleeved bundle pulled from between the wheels. The wheels smooth the sleeving over the bundle for a neat finish.

The whole process takes just a few minutes.

## How to Use The Flexo Sleeving Rapid Install Tool

**Step 1**  
Load sleeving over the tube.

**Step 2**  
Push wire bundle through the machine until it appears out of the tube.

**Step 3**  
Pull both sleeving and wire bundle to desired length.
